FIRSTAID TRAUMA AND CASUALTY CARE (RQF)

FTACC delivers an occupational level of workplace first aid, specifically designed for emergency first aiders at work and low risk workplaces. Candidates will be equipped with skills and knowledge to confidently manage first aid emergencies in an engaging manner using our experience in providing casualty care in a realworld environment.

FTACC is a regulated qualification through Qualification Network United Kingdom (QNUK). The course meets the First Aid at Work (FAW) syllabus in the Health and Safety at Work (First Aid) Regulations 1981 guidance*. The FTACC course maps to the Faculty of Pre-Hospital Care (FPHC) Descriptor B on the Pre-Hospital Emergency Medicine (PHEM) competency framework.

FIRSTAID TRAUMA AND CASUALTY CARE (RQF)

COURSE OVERVIEW

FTACC is an innovative approach to the traditional Emergency First Aid at Work (EFAW) course. FTACC provides the highest standards of education and training for emergency first aiders which can be specially tailored to your needs, taking into account the nature of your business, work activities and subsequent risk profile.

The FTACC approach is a simple and quick way to identify serious problems and avoids missing injuries or illness. It allows candidates to adopt and retain lifesaving knowledge and skills, which are valuable to candidate's workplace environment, friends and family.

Our innovative approach to first aid training is informative, engaging and proven to empower responders in preserving life and reducing pain and suffering from injuries and illness. FTACC meets the FAW syllabus and uses a unique approach to identify and treat injuries and illness.

EMPOWERING PEOPLE TO SAVE LIVES

The role of a first aider is to manage minor injuries, save life and summon help. This can be a huge responsibility requiring a calm yet effective response, often in stressful situations.

The effectiveness of any initial response is directly related to the methods and skills that first aiders are taught which will result in a more favourable outcome. For this reason, FTACC adopts a new and innovative approach to teaching the essentials of first aid at work with the emphasis very much on the learner.

B.U.R.P.S - A NEW APPROACH TO FIRST AID

B.U.R.P.S is our quick and easy assessment method that guides the first aider through the identification of a problem and any subsequent course of action.

B.U.R.P.S is a new approach for assessing a casualty, developed by medical experts, to empower first aiders in the management of medical and trauma casualties

The acronym represents the following:

B – Bleeding

U – Unconscious or reduce conscious level

R – Difficulty breathing

P – Pain or altered sensation

S – Skin changes

What makes B.U.R.P.S unique is that rather than working through body systems it focuses directly on the problem and any required treatments.

**FTACC IS THE FIRST PART OF THE INTEGRATED
EMERGENCY CARE PROGRAMME AND PROVIDES A NEW
MODERN APPROACH TO WORKPLACE FIRST AID**

FIRSTAID TRAUMA AND CASUALTY CARE (RQF)

COURSE SUMMARY

FTACC is a dynamic, engaging effective first aid programme, developed by leading pre-hospital doctors and already adopted by the emergency services and industry. FTACC can be delivered over 3 days (First Aid at Work equivalent) or 1 day (Emergency First Aid at Work equivalent). Both the FTACC and FTACC-E are validated for 3 years and require a 2 day annual refresher to remain competent and qualified.

It meets the Health and Safety Executive (HSE) first aid standards. It adopts an innovative approach which ensures retention of knowledge and skills as well as outline a clear course of action that ensures better patient outcomes.

FTACC is the occupational first aid level course in TAG's Integrated Emergency Care Programme (IECP) which progresses candidates from first aid through to critical care interventions. IECP is a progressive and systematic pathway to enhancing skills, knowledge and empowering people to save lives.

FTACC is medically endorsed and validated by The ATACC Group (TAG) Medical Advisory Group and ATACC Faculty. Which consists of Doctors, Nurses, Allied Health Professionals and Technical Specialists in areas such as Remote Medicine, Search & Rescue, Rescue Casualty Care and Tactical Medicine. Successful Candidates will receive a QNUK Level 3 Award in First Aid Trauma and Casualty (FTACC) (RQF).

WHAT'S INCLUDED

A Free FTACC course manual, lunch, snacks and refreshments.

FIRSTAID TRAUMA AND CASUALTY CARE (RQF)

COURSE CONTENT

- Role and responsibilities of an Emergency First Aider
- Infection prevention and control
- Calling for help
- Scene assessment
- Safe Approach
- Casualty Assessment
- Minor bleeding and injuries
- Internal and external bleeding
- Unconscious breathing casualty
- Casualty with no signs of life
- Mild and severe choking
- Stroke
- Minor burns and scalds
- Handover to ambulance
- Reporting procedures
- Sudden poisoning
- Head injuries
- Seizures
- Chest injuries
- Asthma attacks
- Anaphylactic shock
- Acute Coronary Syndrome
- Sprains, strains, dislocations and fractures

This list is not exhaustive - Additional Content such as Major Haemorrhage, special patient groups, triage and medical devices available on request.

GOOD TRAINING, GREAT TREATMENT

YOU WOULDN'T PAY FOR COOKING LESSONS BY SOMEONE WHO HASN'T ACTUALLY COOKED A MEAL SO WHY PAY FOR MEDICAL TRAINING DELIVERED BY INEXPERIENCED INSTRUCTORS?

The Medics Lodge training team are all frontline HCPC Paramedics serving either with a NHS emergency ambulance service or the Armed Forces. This provides our students with subject matter experts that are equipped with extensive up-to-date clinical knowledge and pre-hospital medical experience. Our instructors only teach what they have knowledge of and what they understand. This contributes to our students' learning and empowers them with genuine 'real-life' reflection and input that inexperienced and non-medical instructors sometimes lack and can only source from a textbook.

"We believe that we can really help empower people to save lives and reduce the number of pre-hospital preventable deaths in the UK. We aim to achieve this through the delivery of 'Good Training' that's educational, realistic and practical which empowers our students with the confidence and competence required to be effective modern medical operators that can provide casualties with 'Great Treatment' in any environment or situation."
